Projects

Online Library Manegment System

- Developed a fully responsive website using HTML and CSS Javascript, php and Java enabling users to browse and borrow books online.
- Implemented an intuitive navigation system with sections for browsing books, viewing details, and managing user accounts.
- Designed a comprehensive book catalog layout that displays book covers, titles, and availability status in a user-friendly format.
- Incorporated search and filtering functionality, allowing users to find books by title, author, or genre quickly and efficiently.
- Created an interactive user account section, enabling users to register, log in, and view their borrowed books.

Portfolio Website

- Built a responsive and interactive portfolio website using HTML, CSS, JavaScript, and React, showcasing projects and professional skills.
- Designed a dynamic user interface with React components, enabling smooth navigation and an engaging browsing experience.

- Integrated a backend with Node.js and Express to manage and store project data, ensuring scalability and data integrity.
 - Deployed the site using GitHub Pages and configured a CI/CD pipeline with GitHub Actions, automating updates and ensuring consistent performance
-
